

Collage

LEASE PROGRAM

Ohio Gravure Technologies offers a cost-effective way for you to use the premiere packaging layout software with the Collage Lease Program. For a yearly fee that includes software upgrades and phone support, you can use all the features of Collage: standard enhancements to optimize engrave quality, and specialty functions like tranScribe with AccuEdge engraving and the exciting new Hybrid engraving, which allows standard and High Quality engraving in one cut.¹

In today's economy, business uncertainties may make large purchases less desirable. The Collage Lease Program allows you to use all the power of Collage to help grow your business for a cost that fits your yearly budget.

Software

- The Collage Lease Program includes the Collage-S software, with no limitations.
- Built-in Jaws RIP allows import of native PDF or PostScript, and Tiff with no preprocessing.²
- Output to Gravostar, DTG-controlled engravers, and Laserstar.
- Available option: Output to Hell engravers
- The software license is programmed for one year. Upon renewal of the lease, the license will be updated.

Upgrades

Software upgrades are included. Customer Support will notify you via email when upgrades are available. They will discuss details of the upgrade with you to arrange a convenient time.

Phone Support

The lease program includes unlimited phone support, whether you believe the software isn't working correctly, or you have an application question.

Contacting Customer Support

Email: service@OhioGT.com • Phone: 1-937-428-1589

Ohio GT is open 8am to 5pm EST. After-hours phone support is available.

Please provide your email address to receive notifications of available upgrades.

1) tranScribe and Hybrid engraving requires special equipment on your engraver.

2) Output of native format PDF and PostScript requires JawsRIP on the engraver.

Note: Customer must supply computer that meets our hardware requirements to run Collage. Refer to our website www.OhioGT.com for detailed information on Collage.

Ohio Gravure Technologies Inc

Engineering Excellence in Dayton since 1980

About Ohio Gravure Technologies

Ohio Gravure Technologies Inc, the developer of the Vision engraving heads, Collage Layout System, Gravostar 857 and 827, and the automated Gravostar HS with Vista II, is bringing our expertise to new markets. With the AccuPress MicroGravure Printing system and the μ Star MicroEngraving system, Ohio GT has targeted markets for advanced micro-machining and micro-printing, including printed electronics, specialty coatings, films, optical, and more.

Ohio Gravure Technologies is leading the way for non-traditional uses of gravure with special application engineered cylinders holding accuracies as tight as $5\mu\text{m}$. For the packaging gravure market, we continue to develop new technology to produce the fastest, most accurate, and cost-effective engraving hardware.
